

ENVIRONMENTAL PROTECTION

The project aims to support developing of the waste management infrastructure and provide additional resources for rural development in Oni Municipality.

Target Group

- Oni municipality government and waste management company staff.
- Local population of the Oni municipality interested in composting and the use of biodegradable waste.

Final Beneficiaries

- Residents of the Oni Municipality
- > Tourists

Project Results

- A model for sustainable waste management in Oni Municipality is developed and approved by the local government.
- Waste management infrastructure is established and necessary management capacity developed.
- Biodegradable waste management practices are put in place.
- Public participation in waste recycling and public awareness about related environmental topics is increased.

Activities within the project

- > Develop a waste recycling model and endorse the developed model within the Municipality.
- > Train the municipal government and waste management company staff in waste separation, recycling and the marketing of recycled resources.
- > Purchase and hand over a waste collection truck and bins to the Oni municipality waste management company.
- Establish business linkages between the Oni Municipality Waste Management Company and waste recycling companies.
- Assist local farmers in setting up the composting yards and biodegradable waste management sites, train them in composting and biodegradable waste use.
- Initiate school campaigns around the Oni municipality targeting youth involvement in recycling activities.
- > Develop and publish educational and awareness raising materials related to waste separation, recycling, composting and the use of biodegradable waste.
